

Workshop on Health Economics “Perinatality in the EU context”

The Faculty of Economics and Business Administration, Alexandru Ioan Cuza University of Iasi, organises the Workshop on Health Economics on the 27th of May 2016.

An important aim of the Workshop is to encourage the debate of various dimensions of health economics, within the research community. The Workshop provides an international forum for the exchange of research ideas on perinatality, maternal and child health, healthcare renunciation, and health inequalities.

The Workshop is organised within the framework of the research project PRaSoP (*Précarité, renoncement aux soins et périnatalité: une comparaison franco-roumaine*) developed with IRIAF (Institut des Risques Industriels, Assurantiels et Financiers) and CRIEF (Centre de Recherche sur l'Intégration Economique et Financière) from University of Poitiers, France.

The application for participation can be made via e-mail to christiana.balan@uaic.ro. There will be no conference fee.

We look forward to meeting you in Iasi!
