

Lista lucrărilor

1. "Identifying DGA-based botnets using network anomaly detection" Dragos Gavrilut, George Popoiu and Mihai-Razvan Benchea, SYNASC 2016, 2016
2. "Feature Creation using Genetic Algorithms for Zero False Positive Malware Classification", Razvan Benchea, Dragos Gavrilut, Henri Luchian, EVOLVE 2015, 2015
3. "Feature Creation Using Genetic Programming with Application in Malware Detection", Cristina Vatamanu, Razvan Benchea, Dragos Gavrilut, Henri Luchian, International Symposium on Symbolic and Numeric Algorithms for Scientific Computing (SYNASC), 2015
4. "Combining Restricted Boltzmann Machine and One Side Perceptron for Malware Detection", Razvan Benchea, Gavrilut Dragos, the International Conference on Conceptual Structures (ICCS), 2014
5. "A Practical Guide for Detecting the Java Script-Based Malware Using Hidden Markov Models and Linear Classifiers", Doina Cosova, Razvan Benchea, Dragos Gavrilut, International Symposium on Symbolic and Numeric Algorithms for Scientific Computing (SYNASC), 2014
6. "Building a Practical And Reliable Classifier For Malware Detection", Cristina Vatamanu, Dragos Gavrilut, Razvan Benchea, Journal in Computer Virology, 2013
7. "A Practical Approach on Clustering Malicious PDF documents", Cristina Vatamanu, Dragos Gavrilut, Razvan Benchea, Journal in Computer Virology, 2013
8. "Practical Optimizations for Perceptron Algorithms in Large Malware Dataset", Dragos Gavrilut, Razvan Benchea, Cristina Vatamanu, International Symposium on Symbolic and Numeric Algorithms for Scientific Computing (SYNASC), 2012
9. "Optimized Zero False Positives Perceptron Training for Malware Detection", Dragos Gavrilut, Razvan Benchea, Cristina Vatamanu, the International Symposium on Symbolic and Numeric Algorithms for Scientific Computing (SYNASC), 2012
10. "Performance Testing Framework: Evaluating The Impact On The System Speed", Paul Bot, Cristina Vatamanu, Dragos Gavrilut, Razvan Benchea, the Workshop on Antimalware Testing Research (WATER), 2014
11. "Hiding The Network Behind The Network. Botnet Proxy Business Model", Cristina Vatamanu, Alexandru Maximciuc, Razvan Benchea, Virus Bulletin (vb2014), 2014
12. "Google and Apple Markets: Are Their Applications Really Secure?!", Vlad Bordianu, Razvan Benchea, Dragos Gavrilut, Virus Bulletin (vb2013), 2013
13. "In-depth Analysis of PushDO Botnet", 16th Association of Anti-Virus Asia Researchers International Conference 2013 (AVAR), Alexandru Maximciuc, Cristina Vatamanu, Doina Cosovan, Dragos Gavrilut, Octavian Mihai Minea, Razvan Benchea, 2013
