ESPA

Front End Developer Internship (RAWFE1806)

Start date
October 2021

Duration
6 months

Languages
Good spoken and written
English levels are required
(B2 onwards)

Location

Ascot, England.

Ascot is a small town located on the southern end of Windsor Great Park in Berkshire, just six miles from Windsor and six miles from Eton. There are lots of places to explore including military museums, nearby dry ski slopes and theme parks. Famed for its prestigious racecourse, the food spots here are not to be missed. If you fancy a trip to the capital city, it's just an hours train ride to London!

Are you eligible?
Are you a registered student?
              Or
Are you eligible to participate in the Erasmus+ programme?

Benefits
See website for details of all ESPA benefits. For all internships over 6 months, additional benefits will be paid. Details available at interview.

Role

This is a fantastic opportunity for a driven, creative, and resourceful front-end developer, knowledgeable of new and emerging digital trends, to work at this fast-growing digital agency. Mentored throughout, you will work closely with the design, UX, development and project management teams and use your knowledge and expertise to code and test; semantic, well-structured, and maintainable cross-browser, cross-platform user interfaces; adhering to the team's current workflow and best practises to deliver projects on time, on budget, and to agreed specifications. If you are looking to work in a buzzing, successful environment, amongst peers with a huge wealth of experience and a real passion for digital, this is the opportunity for you.

Tasks

- Build user responsive and touch friendly interfaces
- Develop new user-facing features
- Develop scalable, flexible, and reusable components and test
- Ensure technical feasibility of functional specifications and test
- Provide input during project and team meetings

Desired Skills

- CSS, HTML, Javascript (ES6)
- Understanding of working with web services and APIs
- Experience developing multi-platform responsive solutions
- Ability to debug and resolve cross-browser/platform issues
- Good understanding of web accessibility
- Good understanding of browser rendering and performance
- Experience with Github or other source control software

Host Company

This host is a fast-growing digital agency who work in partnership with their clients to produce digital products and services that create a lasting, positive, impact. Why do staff love working at this host company? In summary, it's probably down to being part of the best digital team in the UK. Evolving every day and playing a part in the continuous effort for personal and client success. No deadwood, no egos, no arrogance; just a solid team of passionate and positive people making a real difference. They think strategically, critically, and commercially about what they and encourage each other to reach for higher standards, and the rate of improvement is always staggering.
