**Role**

This role can be fulfilled remotely in your home country or partially remotely, in your home country and the UK, or fully in the UK.

This is an exciting opportunity for a back-end software engineer, interested in solving business challenges through innovative AI technology. The host company is an AI start-up already working with the world's leading aerospace and defence companies. They hire the best minds in technology to innovate and build solutions for customers who desperately want to successfully adopt AI within their businesses. They are currently building an Enterprise AI platform to give everyone the power of AI, irrespective of their skill background and thereby create 'citizen data scientist'. Mentored throughout, you will have the opportunity to impact the evolution of products as well as lead mission critical projects early in your career. If you enjoy working on cutting-edge, scalable technology in a team environment and want to write real software with established developers and experienced software engineers, this is the internship for you! An invaluable addition to your CV and real boost to your career prospects.

**Tasks**

- Participate in the development of API endpoints with python-flask (REST, SaaS)
- Implementing pipelines using Docker, Celery etc.
- Database (postgres) development for user data management
- Code peer reviews
- Develop unit test, integration test for CI/CD
- Write code documentation following software engineering best practices

**Personal Skills**

- Studying for a degree in computer Science, computer engineering, data science, artificial intelligence or related fields
- Strong programming experience in Python
- Basic working experience/knowledge in Unix/Linux environment
- Basic knowledge of containerised applications, for example Docker
- Basic knowledge of GPU based highly parallel software development

**The Host Company**

The host company was founded in 2017 with a unique blend of aerospace industry domain knowledge and expertise in cutting edge AI technology. Their aim is to make complex AI technology simple to use and thereby accelerate AI adoption and digital transformation journeys of their customers. This principle is captured in their suite of commercial products namely, AI Boost®, AI Sight, AI Power and AI Distill. Their products and services are suited to end users with a wide range of skill domains, irrespective of the size of the organisation, and assist their AI journey in a responsible, transparent, and ethical manner.
