RAPORT CERCETARE 2008

Scurta prezentare a entității:

Misiune:

Misiunea Facultății de Informatică din Iași este de a pregăti specialiști de performanță care să fie capabili să asigure dezvoltarea Societății Informaționale în România în contextul integrării țării noastre în Comunitatea Europeană. Facultatea de Informatică, alături de celelalte facultăți, se implică prin întreaga sa activitate în dezvoltarea comunității locale și regionale, în creșterea prestigiului Universității "Alexandru Ioan Cuza" atât pe plan național, cât și internațional.

Domenii de cercetare:

Baze de date distribuite si orientate-obiect
Biologie computationala
Calcul distribuit
Calcul paralel
Coduri si criptografie
Interactiune om-masina
Invatare automata
Logica informatica
Metode formale in ingineria programarii
Modelare si verificare
Optimizare combinatorie
Prelucrarea limbajului natural si tehnologii ale limbajului uman
Soft computing (algoritmi genetici, tehnici evolutive)
Tehnologii Web

1	Informatică	FP7-CAPACITIES	Grant Agreement nr. 212230 /2008	CLARIN - Common Language Resources and Technology Infrastructure	Dan Cristea	50,493		1 prof., 1 ACS	<p>The ultimate goal of CLARIN is the construction and operation of a shared distributed infrastructure that aims at making language resources and technology available to the humanities and social sciences research communities at large. The preparatory phase will pave the way for implementation along 4 dimensions:</p> <p>Funding and governance: The aim is to bring together the funding agencies and to work out a ready-to-sign draft agreement between the funding agencies in the participating countries about governance, financing, construction and operation of the infrastructure. Technical: The technical objective is to provide a detailed specification of the infrastructure, agreement on data and interoperability standards to be adopted, and a running, validated prototype based on these specifications.</p>

2	Informatică	FP7-COOPERATION	Grant Agreement nr. 214856 /2008	ALEAR - Artificial Language Evolution on Autonomous Robots	Dan Cristea	108,465		1 prof., 1 conf., 4 ACS	This tightly integrated focused project aims at fundamental breakthroughs in understanding and synthesising the mechanisms achieving cognition and language. It engages in carefully controlled experiments in which autonomous humanoid robots self-organise rich conceptual frameworks and communication systems with similar features as those found in human languages. Language and cognition are seen as complex adaptive systems that are continuously shaped by the actions of their users.
3	Informatică	FP6 STREP	GA nr. 027391/2005	LT4eL -LANGUAGE TECHNOLOGY FOR ELEARNING	Dan Cristea	23,231		4 prof., 1 asist., 1 prep., 2 drd.	The aim of the Language Technology for eLearning (LT4eL) project is to tackle this problem by providing Language Technology based functionalities and by integrating semantic knowledge to enhance the management, distribution and retrieval of the learning material. Specifically, we will employ Language Technology resources and tools for the semi-automatic generation of descriptive metadata. We will thus develop new functionalities such as a key word extractor and a glossary candidate detector, tuned for the various languages addressed in the project (Bulgarian, Czech, Dutch, English, German, Maltese, Polish, Portuguese, Romanian).
